STATE OF MICHIGAN, COUNTY OF Washtenaw, ss. At a session of the Probate Court for the County of Washtenaw, holden at the Probate Office in the City of Ann Arbor, on Monday, the third day of October, in the year one thousand eight hundred and eighty-seven. Present, William D. Harriman, Judge of Probate. In the matter of the estate of George Holden, deceased. John Holden and Sydney O. Rathfon, the administrators of said estate, come into Court and represent that they are now prepared to render their final account as such administrators. Thereupon it is ordered, that Tuesday, the first day of November next, at ten o'clock in the forenoon, be assigned for examining and allowing such account, and that the heirs-at-law of said deceased, and all other persons interested in said estate, are required to appear at a session of said Court, then to be holden at the Probate Office, in the City of Ann Arbor, in said County, and show cause if any there be, why the said account should not be allowed. And it is further ordered, that said administrator give notice to the persons interested in said estate, of the pendency of said account, and the hearing thereof, by causing a copy of this order to be published in The Yrshantan, a newspaper printed and circulating in said County, three successive weeks previous to said day of hearing.

WILLIAM D. HARRIMAN, STATE OF MICHIGAN, COUNTY OF

WILLIAM D. HARRIMAN, [A true copy.] Judge of Probate. Wm. G. Doty, Probate Register. 059.

SEASON OF 1887-8.

The Committee having the Course in charge, beg leave to submit to citizens and students the following

ANNOUNCEMENT:

1. Ten regular entertainments have been provided to be given at the Opera House at intervals of about two weeks, beginning early in November. Specific dates for each will be announced soon.

In the selection of talent merit has been the first consideration, expense being secondary. We felt that former liberal patronage warranted us in making engagements at an advance of several hundred dollars over those of last season. As tastes differ, we have aimed to secure representatives in various lines, but all of such eminence and excellence as to entertain, edify and instruct the entire audience.

2. Contracts have been made for the following:

LECTURES.

(1) Rev. Jahu DeWitt Miller, of Con-

Subject-The Uses of Ugliness.

Mr. Miller is beyond question one of the brightest, easiest and most entertaining lecturers that the rostrum has to-day, Says a New York paper: "The lecturer held the closest attention of the audience for nearly two hours. (3) Wallace Bruce, of New York. Subject-Robert Burns

Mr. Bruce is a master of the platform, and has won the highest commendations as scholar poet and orator throughout the eastern States. For classic diction and beauty of thought, he never fail to charm an audience. Such papers as the New York Tribune and Evening Post, the Springfield Republican, New Haven Journal, the Cincinnati Enquirer and Gazette, speak of his lectures in terms of unstinted

(4) Hon. W. H. S. Aubrey, LL. D., of England, late Gladstone candidate for Parliament in London.

Subject-"Gladstone; his Characteristics, his Personality, and his Career.

Dr. Aubrey is the anthor of tho "National and Domestic History of England," a work in three volumes published at \$20, of which over 25,000 copies have been sold. He is not only eminent in literature, but is a leader in the English Liberal party, and is celebrated as a ready, eloquent and convincing public speaker. The London Times says: "He is a com plete master of his subject, and speaks with great power and as an accepted authority.' Says the New York Independent: "No Lecture Course can afford to miss Dr. Aubrey."

Their program con sists of English and Welsh choruses, glees and soles, which are sung with an enthusiasm, fire and agility that is indescribable. The Ladie appear in their quaint national costume, in cluding the sugar loaf hat. The high ability o this troupe is certified by testimonials from vell known critics, while the "press notices" from the leading cities of England are com plimentary in the extreme.

3. The ten entertainments above speci fied constitute the "Course." Two addi tional entertainments of a high order, one literary and one musical, will, however, be given during the season as extras, to each of which season ticket-holders will be ad mitted for the nominal charge of fifteen cents, which will include a reserved seat. 4. Eight hundred season tickets will be

for sale on the following plan: Three hundred choice seats will be marked off for which coupon tickets, called "Citizens' Tickets," will be put on sale at the following scale of prices:

50 Tickets at \$4.00 each, 50 Tickets at \$3.50 each, 200 Tickets at \$3.00 each.

Five hundred coupon season tickets called "Students' Tickets," will be sold at the following rates:

200 Tickets at \$2.00 each, 300 Tickets at \$1.00 each.

These tickets will entitle the holders to the same seat for every entertainment of the regular Course.

5. The price of admission to single en tertainments to those not holding season tickets, will be 50 cents, 75 cents, and \$1. according to the character of the entertainment.

The sale of the 300 "Citizens" Coupon Season Tickets will take place at the Opera House on Monday, October 24, beginning at 2 o'clock P. M.

The sale of "Students' Tickets" will take place at the Normal School, Thursday and Friday afternoons, October 20 and 21, beginning at 4 o'clock

Mr. and Mrs. Amos Fifield have a sister visiting them from Northville. At present there is no bridge at this place and the prospects are that we will not have one before December 1st. The following is from the Belleville correspondence to the Courier and is about the sentiment of the people in this vicinity:

The negligence of some one or more in not rushing the matter of completing the Rawsonville bridge according to contract, is being looked upon by traveling public as a gross outrage The time is already passed, and who-ever is to blame should be made to pay dearly for every day that the road mains impassable. We presume that the officers having in charge the making of the contract inserted a forfeiture clause specifying a daily foreiture to cover non-compliance with the condi-tions thereof, and if so, no excuse should be held as against the inconvenience travelers are put to, and if not the officers themselves should be held responsible. The matter seems to be hung up a good deal like the Dutchintends it, extends the time to suit his own convenience, and then will accept it himself; verily a soft snap.

[Mr. Chas. Fletcher, highway commissioner, received a communication from the bridge company who have contracted to build the bridge, inform ing him that they were loading the material at Massillon, Monday, and would firm from whom the iron was purchased delay.—Editor]

Whereas Almighty God in His wise Providence has taken out of this world the soul of our deceased brother, William R. Post, thus removing from our counsels a good and wise man. We therefore desire to express our sense of his loss and thankfulness for his example not in mere formal resolutions but in the following minute:

Wm. R. Post came to Ypsilanti in the year 1883 and was thoroughly identified with its life and interests till the day of his death. He was a respected member of the community throughout a life of social, political and business energy and when he passed away many were the mourners for his loss. He became a member of the Protestant Episcopal church in 1848 and was, with his whole family, fully and affectionately identified with its life and polity during his long remaining life. Basil's shoulder, and drew him so close that he could almost feel the man's strong heart beating against him. "It is your own fault-you have

brought your doom upon yourself!" Basil scarce heard those whispered words, but he did feel the swift sharp pain in his heart, and reeled back with a low erv.

before you, and found Basil standing near the table, one hand clutching the cloth. I started forward to catch him before he fell, but as I did so the lamp was dragged to the floor, leaving us in darkness; my hand had only touched him when he dropped."

Lily started erect, and pointed to the "Go for help; whilst we are wasting

ple had gathered in the room, and Lily knelt beside him, his head on her breast, whilst the crimson blood dved her pure white dress; her eyes were fixed on his face with perfect despair, her hands tried in vain to feel the faint beatings of his heart.

The doctor's face was grave, as he looked at him-it was graver still when he rose, after a few minutes' examination.

"The blow struck home! Poor lad! he was too young to die like th s!" "Dead!" Lily said wildly, letting her face rest against that colder one.

smile crossed his lips. "She had no positive proof; Simon will be found guilty, and suffer for my tween me and vengence!"

Silence had fallen over that griefstricken group; all eyes rested on the jewel held so loosely in Squire Glandore's hand.

Clouds were fast gathering around Simon's happy home, for as all recognized Peggy's dainty wedding-gift, dark suspicions entered each mind against her young husband.

Only Lily refused to believe, but how could she define the strange instinct which made her think the hand that fixed the guilt on another had "No; why should I, when she does done the deed."

> CHAPTER III. And my soul is sorely shaken. Lest an evil step be taken— Lest the dead who is forsaken, May not be happy now.

Everything was against Simon Leigh. Of what use was it for him to swear he had left young Glandore alive and unharmed after his interview? It was well known through the village that scandalous tongues had been very busy with Peggy's name, and had hinted at something more than mere gratitude in Basil's attention to his poor wife.

What more natural than that Simon should be jealous, and in a fit of madness cruelly stab one whom he looked at as a rival?

Almost tremuously the wretched man acknowledged having been with Basil that night expressly to return the pretty trinket. Several of the servants had seen him enter-no one saw him leave.

Ralph's evidence, quietly given, told greatly against him. He had found Basil alone in the morning-room, the window wide open, and heard his last

"Good Heavens! He has killed me!" Lily was the next witness, and try as she would, she could not avert the dark fate that threatened Simon now. Her faltering words, though few, effectually sealed the man's doom.

A bitter cry rang through the court when the sentence was given -a cry full of horror and despair, and poor Peggy was borne senseless away.

"I thought there was no hope for him, yet I cannot believe him guilty!" Gipsy murmured despondently when her brother told her the verdict. "It is a hard sentence-lifelong im-

prisonment; better death at once!" "Nonsense!" Ralph said sharply, turning a pair of angry eyes full upon her. "The man deserved all he got: hanging was much too good for him! "You are cruel!" Gipsy whispered

tremuously, "Even I did not wish

Simon to be punished." "Yet you loved Basil, or though. you did," Ralph answered mockingly, Gipsy's pallid checks grew warm hold, and sank on her knees beside and tears trembled on her dark lashes. life, and would gladly have died to save him. If I could only find out the real murderer there would be little

feel almost uncomfortable. "I must be careful; a detective in the house would scarce be pleasant. I wonder what has put the idea of Simon's innocence into her head? Poor Simon! I pity him; he is indeed a

Again he laughed, and that discordant sound reaching Gipsy's ears made her shiver in spite of herself. Her passionate little heart could feel no 1, as cold weather approaches. Railway Employes Subject to a Disease Known as Railway Brain.

At a recent meeting of the Physicians of the Charity Hospital in Berlin, Thomsen exhibited a patient whose case he described as one of "railway brain," a neurosis resembling in many respects the condition already known under the name of "railway spine." A healthy railway employe, aged 30, without history of alcoholism, or of any pre-disposing neurotic codition, by the sud-den motion of his train was thrown violently against the side of a car, striking his head.

He sustained no wound, and at the time of injury consciousness was preserved. Some hours afterward, however, he was suddenly se zed with syncope, with mental terror, lost all sense location, could not recognize the simplest famil ar object, and described what he saw erroneously: his one objective symptom was absolute anæsthes a of the entire body. On the fourth day of his injury he had violent headaches, a pulse rate of 44, and, in addition to the cutaneous anæsthesia, loss of olfactory and taste sensations, with difficult hearing. On the fifth day the psychic symptoms suddenly ceased, he could remember nothing which had happened, and had no explanation for his condition.

The patient subsequently became very melancholic, complaining of insomnia, headache, spinal pain, weariness, and failure of appetite; no sensations of terror or disordered dreams were present. The objective sympremaining were well marked toms cran'al and spinal hyperæsthesia; failure to distinguish between white and colors; loss of smell and taste, and impared hearing; numbness, and at times paresis and spasms of the region suppl ed by the facial nerve were also present. He was discharged from the nospital as improved, but two months afterward his condition was unchanged; he was unable to work on account of headache and weakness. Thomsen's diagnosis was "railway brain," a condition of profound disturbance of cere-

bral functions from shock. The increase in mechan cal appliances, and the immense extension of railways, afford abundant opportunities for observation of nervous shock, both in its fatal and milder forms. While postmortem demonstrations of hemorrhage and structural lesions, explains the course of these cases when fatal, it is evident that we must rely upon the continued observation of surviv-ing patients to determine the development of lesions which will illustrate the pathology of this condition. The possibility of the production of degen erative changes in nervous matter, and cerebral conditions causing permament mental impairment, is an interesting question for neurologists, and, in it medico-legal aspects, for the corpora tions whose property may cause such injuries to their patrons and employes. -Medical News.

Making Cream Churn Easily.

Mail and Express.

A lady friend, an experienced and successful butter maker, thus explains how she makes the butter come quickkeeps the cream crock in the cellar as cool as possible, and as the natural result it is too cool for good butter making. If the cream is directly neated over the fire it is apt to make oft butter, as every housewife knows. What she does is to take a quart or a little more of sweet milk, heat it quekly over the fire and then mix it with the cream already in the churn, adding enough to bring it up to the r ght temperature. The butter comes gickly b th s method, and is not made soft late in the season. It is not a plan so well adapted to butter making in hot weather, for then the cream, unless kept on ice, usually needs no warm ng. Some use hot water instead of milk, but the advantages of the latter is that the warm, sweet milk imparts a better flavor to the butter and greatly improves the buttermilk, besides, of course mak ng more of it.

There is probably only a very small increase of butter that comes directly from the heated sweet milk. Possibly th's furnishes no butter; but it does separate the butter particles more perfectly from the cream than is possible otherwise. The yield of cream and butter from milk should under most circumstances naturally increase in proportion to the milk as the amount of butter is lessened. A farrow cow five or six months after calving gives less but richer milk than she does at first. But what avails this to the butter maker, if he or she cannot separate the butter from the cream in which it is enclosed. Adding warm sweet milk seems to entirely remove this difficulty, and has many other inc dental advantages-American CulThe Rise of the Nile.

When the time approaches for the inundation the Arab farmer is all expectancy, says a writer in Scribner's Magazine, describing the overflow of the Nile. His canals are cleared and he protects his home by dikes and walls of adobe. This done, seated at his door, he watches with satisfaction and gratitude the rise and approach of the water which holds his little wealth. It is several months rising to its greatbandman's farm. His palm-trees seem to rise to a greater reach and their waving branches add to the sense of calm and content which pervades all.

Already his well-filled canals have defined themselves and his irrigating machinery is at once put in repair. There is no more use for the boats which have served to carry him from place to place during the inundation. They are hidden among the rushes on the banks of the canal. Every available person is now pressed into the service. If the thin deposit of mud left by the departing river is kept moist its value remains at par. If the hot sun is allowed to play upon it unopposed it soon becomes baked and curls up into tiny cylinders, then, breaking into fragments, it falls dead and worse than useless. Therefore the process of irrigation must begin at once. The rude sakiyeh and the ruder shadoof are kept going night and day and give employment to tens of thousands of people and cattle as well. With these primitive appliances the water is lifted and emptied into the channels which have been dug or diked to receive it. From these larger receptacles the water is led to smaller ones, which, overflowing, cover the In a little time then a Nile farm be-

comes a rare beauty-spot instead of a waste of mud, for now the crops are grown. The lentils bend with their heavy load and the fields of grain turn their well-filled heads from side to side that the ripening sun may change their green freshness into gold. What landscape unadorned by art can be more lovely than such a farm; narrow though its limits may be, with its grove of palms to fan the breeze and scatter their sweet fruitage into the lap of the happy fellahin? Here no weeds grow to annoy him. No stone crops are belched to the surface each year to stop the plow. And this is good, for the Egyptian plow has no scientifically curved coulter or subsoil

The Hibernian maid had been to the postoffice. She was new to the family and the place, and, as people do when the locality is strange, she noticed all sorts of little things she could see at home, but had never thought of before. She walked into the room with a letter in her hand. "Here's a letter for you, madam."

The mistress took it and looked at it. "It looks like a bill," she said. "Arrah, no, madam. It can't be a bill. Sure they don't send bills through the postoffice."

"What makes you think that?" "Well, madam, down at the postoffice I see a sign, an' its got printed on it: 'Post no bills.'"-San Francisco

"Old Abe."

"Old Abe," the whilom war eagle of the 8th regiment, Wisconsin volunteers, is one of the attractions at the collection of war relics now on exhibition at the Exhibition building. He is only stuffed and doesn't look as big as when he accompanied the eagle regiment on southern battle fields. wooden tablet attached to his perch bears this inscription: "Hatched February, 1861; died March 26, 1881.'

E. H. Webster, of Greenbusch, Sheboygan county, lieutenant of company B, of the 8th regiment, gave a Milwankee Sentinel reporter some information about the old bird. "When our company came into camp at Madison we were told by the men of company C, who brought the eagle with them from Eau Claire, that he was taken from his nest by an Indian and presented to them by him. I have read a more romantic tale of his capture since then, but this story is undoubtedly correct, as nobody then thought of inventing the pleasant fictions about the famous eagle which have since become so numerous. Our regiment broke camp at Camp Randail, in compliance with an order to go to Missouri, and while marching through St. Louis the eagle broke its that that was the last we would see of him, and Col. Murphy offered to give \$25 to anyone who would bring him back. You know Murphy, don't you? He left our regiment and was put in charge of a brigade, and surrendered to the Rebels at the battle of Holly Springs. But I am disgressing.

We put him on a string again ly we let him loose during an engagement, and then he would fly about overhead or sit quietly on his perch. I believe the confederates brought down some of his feathers once, and after that he always screamed and acted mad when a fight was going on. Gen. American and English Beauty.

If one looks into the question of relative English and American beauty, it is plain that the manifest superiority of American women is due part to their knowing-ah! how well they know!—how to make the best of themselves. One thing is painfully common even among the best-kept English women, and that is an unsightly gap in the teeth where one has been removed—it may be a front tooth itself. They never seem to think it necessary to have it replaced, and it gives a positive shock to an American accustomed to the scrupulous care of the teeth practiced by their country-women. Another difference is in the grizzled hair of many English ladies who don't seem to have acquired the subtle spell of the American woman of 50 or thereabouts, whose hair sudden- only shape and forme that the ly turns to a lustrous, dazzling white, making the features twice as young by contrast. Of course the American ladies deny that they do anything to tide over the grizzled period, but all the same there are no grizzlies in American society, and there are innumerable handsome middle-aged women with snow-white hair and youthful faces. This invaluable result has not yet crossed the Atlantic, but English ladies are sighing for it. They often ask, "How do the Americans get their snow-white hair at 45?'

Che Ppsilantian.

THURSDAY, OCT. 13, 1887.

Now comes The Ypsilantian, a republican organ, and exultingly asks if there is not a duty on wheat and other products of the farm. We answer that there is, but what person whose skull is stocked with a modicum of brains will contend that the farmer derives the slightest benefit from that duty? The price of wheat in this country is determined by the price which the Liverpool grain merchants are willing to pay for the surplus which we have to send abroad. A tariff of \$10 a bushel on wheat would be powerless to raise the price of the staple article in the New York market a single cent.—Lansing Journal.

Does it then follow that taking off

Does it then follow that taking off the tariff from wheat would not lower the price? We will not argue the matter of brains. We know the Journal has some, and it can not therefore believe that opening the ports to free importation would not bring in greater quantities of Canadian grain, and even But where shall I be, tell me where shall I be When the spring-tide and summer that I shall I be when the spring-tide and spring-tide a Indian wheat from the west, whenever the American market would afford better prices than they would realize elsewhere. The Journal must admit, too, that that would tend to bring our market to the level with theirs, and thus that the tariff on wheat does protect the farmer. Of that favorite declaration of the free traders that Liverpool fixes the value of American wheat in American markto consume the whole of our product, so that there shall be no surplus for export. At the present rapid rate of growth of manufacturing industries throughout this country, under the fostering influence of the protective policy, that condition should be soon realized, and the farmers of America be emancipated from any dependence upon the traders of Liverpool, real or instead of relieving, the free traders propose deliberately to fasten forever, and to indefinitely increase, by removing not only the protective tariff upon wheat, but, what is of far greater importance in its protective influence upon the farmer, the tariff upon manufactures, which gives him the only desirable market he now has.

"the projectors of the canal make no pretense that it is national in its character," is to disregard every word that has ever been uttered in its behalf by any of them AT the McKendree Methodist church in Nashville, Tenn., last Sunday, Rev. Dr. W. A. Chandler delivered a severe invective against the stage and the habits of many stage people. Miss Emma Abbott was in the congregation, and at the close of the discourse she rose and declared that she had been on the stage from her ninth year, and had always See the Sign of the Bay Horse tried to do her duty before God; and she defied anybody in the world to say one word against her fair name. The clergyman said he would not reply to the lady.

IF the Free Press would gather some

information on the subject of the Hen-

nepin Canal, it might talk more accur-

ately about it. To say that it is a pro-

ject, "as purely local and private as the

Detroit Boulevard," is to display ignor-

ance or recklessness; and to say that

sense if he had made a different reply. THAT useful paper, the Saginaw Morning Herald, speaking of the controversy over the doctrine of probation ofter death, thinks "it will be a very great relief to have this vexed question permanently decided." The Herald can now find its relief. Since its paragraph was written, the question has been "decided," by the American Board. The heathen must burn.

but that the performance was more suit

ed to the theater than the house of God.

Miss Abbott would have shown better

IF leading republican papers can be justly regarded as representative of the sentiment of their party the democracy may reasonably hope for some aid in tariff reduction this winter from Illinois and Minnesota republicans. The Chicago Tribune and the St. Paul Pioneer-Press, the leading republican papers of the two states named, are outspoked in their denunciation of the protectionist proposition.—Free Press.

As the Chicago Tribune and the St. Paul Pioneer-Press have been for many years just as outspoken in that direction as they are now, and the republican party has steadly gene in the opposite direction, it would not appear that those "leading republican papers can be justly regarded as representative of the sentiment of their party" on that subject.

HE WON'T HELP. A person signing himself A. Owen Crozier, of Grand Rapids, takes a full column of the valuable space of the Free Press to say that he will never, no, never lift a finger to help the enforcement of the local option law for the securing of prohibition in the counties; because, he says, "it will be better for Michigan as a state that the saloons remain open in the rural districts a few years longer." He is moved to that opinion by the reflection that it is not possible at present to close the saloons in the large cities. He would not, he says, "be understood as being in favor of putting a saloon by the side of every man's home to trap his son in order to stimulate his energy," but that is precisely what from his own words he is understood to recommend. The Free Press, which is a great authority in such matters, editorially endorses Mr. Crozier as being a simon-pure A 1 prohibitionist. If he is the same A. Owen Crozier who disappeared from this county directly after the election last fall, he probably has the credentials to support the Free Press estimate; and they will read, "Prohibition Ticket: For Congressman, 2d district, A. Owen Crozier." On the margin will be found penciled, "200 short," and on the back, "431 short." Those are the figures, respectively, which A. Owen Crozier lacked of running up to his ticket in this county and in the district; while he lacked 3,496 in the county, and 14,820 in the district, of rolling as many votes as the prohibition etc. amendment received.

WHERE?

There will come a morning that I shall not see,
And a summer whose sunshine and greenness
will be
As fair to all others as this is to me;
But where, when that morning shall dawn will
I be?

There will be a mound with the grasses grown And a headstone, perchance, with my name and no more;
And the sun will shine brightly as ever before, And the birds sing as sweet in the trees at my door.

It will all be the same when my feet are at rest.
And my hands folded over my motionless breast; The pathway I trod by new feet will be pressed.

And the friends I have loved with new friendship be blessed.

Some hearts for a little may grieve that I'm And a shadow will darken the sunshine of But the shadow will pass and the brightness

I would not have it linger on heart or on home. not see Come back with the wealth of their beauty so To all of the living, but not unto me?

Oh! surely, I shall not be senseless and cold; This soul will be thrilling, as ever of old. As beautiful visions before it unfold Of the wonders and glory that never were told.

I shall not be buried away out of sight, For I shall be climbing a pathway of light That stretches away to the infinite height, Far over the shadows of darkness or night.

ets, if it be true, we think it a strong argument against free trade, and in favor of such policy as shall enable us

And I shall be there what I longed to be here, As I grow in the warmth of that radiant sphere Unbindered, unbaffled by earth's chilling fear. Then what if a morning that I shall not see Shall robe in its splendor the mountain and sea,
Since there's nothing of loss in the land where And a thousandfold glory is added to me.

Extensive preparations are being made at Memphis. Tenn., for the convention to be held in that city Oct. 20 and 21 for the improvement of the Western waterways.

AT INDIANAPOLIS the other day a claim was filed by a saloon keeper against a dead man's estate for twenty gallons of whisky purchased by the deceased in the last five months of his life. No wonder the man died.

THE President is receiving an ovation at all points on his western journey. He will return to his duties with a better understanding of the greatness of the country whose chief executive he is, and a loftier appreciation of the honorable place he fills.

THE average man throughout the civilized world annually consumes 446 pounds of grain, 70 pounds of meat, 7 pounds of butter and 20 pounds of sugar. When the reader takes into consideration the tobacco he chews and the fluids he gets away with, the amount of stuff he consumes is enormous.

The United States Navy has long been the butt of international ridicule, but when it comes to rigging upracing yachts we can't be turned down. The American the first of their series of races without half trying, thus maintaining an unbroken record of victory of many years for American sailing yachts.

THE expression, "the skin of my teeth," is commonly supposed to be vulgar slang. Upon reference, however, to the Bible. Job ix 20, the true origin of the expression will be found. Many other expressions regarded as vulgar are traceable to the same high authority, while not a few generally attributed to the same are of different origin.

THE Chicago News hit on a new thing in the way of a reception to Cleveland, and publishes three or four columns of interviews with and letters from a large number of prominent people of all parties regarding their opinion as to the kind of a President Cleveland has made. The hours. opinions vary in tone from the most flattering to rank abuse.

THE Secretary of the Treasury finds the appropriation for collecting the customs revenue running short, and has consequently issued an order requiring officers having authority to nominate persons for appointment in the customs service to "make such recommendations as will cause the least possible expenditure consistent with a prompt transaction of public business."

THE new postal laws and regulations have gone into effect. Among the many important changes the postmaster-general has made in his revision that the public is interested in, is that postal cards are now returnable. The section relating to postal cards says that they may be forwarded on request, and should be returned to the writer to the office of address when unclaimed.

It is now pretty well settled that Americans can build faster yachts than any other nation. If this was doubted before, the recent races between the Thistle and Volunteer have removed that doubt. The latter won by a lead of fifteen minutes in a run of forty miles. The London Newssays: "England has to learn a lesson from Americans in this branch of ship building and had better go about it at

THE present year promises to be notable for two things, the number of terribli casualities which it has witnessed and the number of new political parties to which it has given birth. Hardly a week passes that we do not hear of the organization of some new political movement, which, in the language of its originators, is "bound to sweep the country" at some date in the near future. The country will indeed be terribly swept if all these predictions are fulfilled. The labor agitation has given rise to no less than three or four distinct parties each one having for its object the crushing out of "capitalistic monopolies." In New York there are now five separate tickets in the field for the coming State election; the Republican, Prohibitionist, Democratic, Henry George, and Progressive Labor. Other parties are yet to be heard from. That must be a man difficult to please who can-

This was from 9 to 11 o'clock, but it was impossible for one-tenth of the people to shake his hand. The arrangements were good but there were too many people to all enjoy the privilege.

Monday opened beautifully and at 10 o'clock the President and Mrs. Cleveland were escorted by a committee of citizens from the residence of Mayor Francis to the fair grounds. A large procession had formed at an early hour and they attended the party. Not less than 30,000 people were seated in the arena when the guests were driven around so that they could see and be seen. Here they listened to the singing of "America" by 3,000 children and were presented with flowers by the little ones attending the Kindergarten. During the time the party remained in the arena, shouts of welcome were heard from all sides. The procession then swept rapidly west to Wabash avenue, north to Jackson, west to La Salle, north to Adams, west to Market, north to Monroe, east to 5th avenue, north to Washington, east to Michigan boulevard, past the reviewing and Congress street, where the organizations disbanded. All along the line of cis, and made a short speech in response march which was a very long one, crowds of people lined the sidewalks, the windows were full of people, the house-tops were covered, and unfinished buildings, telegraph poles and street lamps were utilized by sight-seers. Everywhere there were shouts of welcome, and the President and his pretty wife acknowledged the greetings with evident pleasure.

> At the reviewing stand there were not less than 30,000 people massed for an hour before the Presidential carriage reached that point. In fact, in every direction there were people by the thousands, blocking the streets so that it was impossible for a pedestrian to reach any particular point. The city was in holiday attire. Flags, banners, streamers, etc., were floating from public and private buildings. Mottoes and words of welcome met the eye in every direction. Arches were erected at a number of points, the most magnificent being at the intersection of State and Monroe streets of which our illustration gives a pretty fair

At the reviewing stand, the President Mayor Roche, and other members of the party descended from their carriages and at the moment that the President took his seat on the platform a'signal was given to the man-of-war Michigan, from the top of the Pullman building and a salute of twenty-one guns was fired. As the last report reverberated through the air, Mayor Roche arose and delivered the welcome address to the President, who stood in an easy and graceful position. The Mayor's address was a model in its way and only equalled by the response of the President. Both speeches were applanded to the echo.

At the conclusion of the review the prossion disbanded, and the President was driven to the Palmer House, where with Mrs. Cleveland and other members of the party, he partook of a plain and simple lunch, and as soon thereafter as possible, the party returned to the main floor to begin the public reception for which the thousands that were in and around the hotel were waiting.

The President and his wife were assisted in the reception by a number of distinguished gentlemen and ladies, and for about two hours all sorts and sizes and kinds of people, to the number of probably 10,000 passed before him, and as near as possible he grasped the hand of each one. Mrs. Cleveland did not take so active a part in the reception as she might have done if she had not been so near tired out. In fact, she had been compelled to drop out of the procession on account of weariness. The reception, however, was very satisfactory. At 6:45 the party sat down to an excellent lunch, and immediately thereafter made ready for the reception at the Columbia Theatre, to which over 6,000 people had been specially invited.

At 11 o'clock the reception ended and the party returned to their hotel for the rest they so much needed.

At 10 o'clock the depot was reached and the Presidential party entered their special train and were whirled off in the direction of Milwaukee, the Cream City, where an-

The night was dark as pitch, but danger was lest my horse should stumble in a hole and run away, leaving I fired into him again, and twice more me on the prairie. To prevent such a catastrophe I tied one end of my rawhide lariat to the bridle, and the other to my belt, a wise precaution, for within a few miles my horse fell twice in prairie dogs' holes, and got away before I could get hold of the bridle, but when he got to the end of the lariat he discovered that he was picketed to Bison Bill, which considerably abated his playfulness. In this way I proceeded through the night, and reached Walnut Creek, twenty-five miles out, in good time. It was here that I met with my first adventure. Arrived at the post soon after reveille, I made straight for General Sheridan's headquarters, and presented my despatches in person. I was most cordially received by the General, and, having taken food, and seen that my horse was well cared for, thought I would proceed to take timepiece. There is simply a prim a little rest. It was, however, not to dial plate, around which two long be, for I was suddenly sent for by the crooked fingers creep, with open air General, who wished to see me. As I approached headquarters I noticed a four brass weights on cords dangle six number of scouts grouped together, feet below the face. It was going and evidently engaged in discussing during the fair and attracted a great something important, and I soon learned what this was. General Sheridan desired to send an important despatch to Fort Dodge, a distance of ninety-five miles. Volunteers were requested, but none responded. The General told me this, and what could

The General expressed himself greatly pleased at my offer, but at the same time said that he had not thought of asking me to undertake the duty, as I had been fully hard-worked a ready. But it was very important that the despatches should go.

"If you don't get a courier by 4 ness," I responded, "but I must have a fresh horse, and meantime will take a little rest." It was not much rest I crossed Smoky Hill river at dark, two screws, which give a speed of 13, to Sam Log Crossing on the Pawnee cavalry were posted, under Major Cox. Hints to Housekeepers.

Hang up the brooms; they will last longer. Clogged wicks can be cleaned by

boiling them in soapsuds. A teacup of lye in a pail of water will improve the color of black goods. In sweeping carpets use wet newspapers wrung nearly dry and torn to pieces. The paper collects the dust but does not soil the earpet.

In a Storm of Dust.

An English traveler, Mr. A. R. Hope, writing from South America of life on the pampas, relates some experiences that were new and strange. Here is his account of a storm he witnessed one afternoon while he was visiting some herdsmen on the plains. "A dust storm!" they called to him, and almost before he had time to make any inquiries it was on them. The air was crowded with birds flying before it.

The next indication of its approach was that we felt particles of dust blown in our faces, and soon this dust not only increased in denseness, but was mingled with pieces of plants and other substances carried along by the wind with such violence as to make the skin smart wherever it struck it. The whirling clouds grew larger and

Peals of thunder were heard not far off, and before long the force of the wind was so great that it was d fficult to keep one's footing.

At the first signs of the storm the cattle grew restless. The herdsmen tried to round them up; the great herd swayed to and fro and began to move before the wind. The last thing we saw before the dust got so thek that we could see no more was the whole mass going off at a long, swinging By this time most of us were safe in the house, where soon it was so dark that lights had to be brought into the room. -) outh's Companion.

Bill Nye's Embarrassment at Hotels. Nature did not fit me to be the suc-

cessful guest at hotel. I can see why it is so. I do not know how to impress a hotel. I think all the way up from the depot, as I change hands with my hot-handled and heavy bag, how I will stride up to the counter and ask for the room that is generally given to Mr. Blaine, but when I get there I fall up against a cold wave, step back into a large india-rubber cuspadore, and my overtaxed value bursts open. While the porter and I gather up my collars and gently press them in with our feet, the clerk decides that he hasn't got such a room as I would want.

I then go to another hotel and succeed in getting a room which com-mands a view of a large red fire escape, a long sweep of undulating eaves trough and a lightning-rod-usually No. 75, near the laundry chimney and adjoining the baggage elevator.

After I have remained at the hotel

several days and paid my b ll whenever I have been asked to do so, and shown that I did not eat much and that I was willing to carry up my own coal, the proprietor relents and puts me in a room that is below the timber line, and though it is a better room, I feel all the time as though I had driven out the night watchman, for the bed is still warm, and knowing that he must be sleeping out in the cold hall all night as he patiently watches the hotel, I cannot sleep until 3 or 4 o'clock in the morning and then I have to get up while the chambermaid makes my bed for the day.

I try hard when I enter a hotel to A teaspoonful of borax in a quart of assume an air of arrogance and defi-warm water makes an excellent wash ance, but I am all the time afra d that there is some one present who is acquainted with me.

Another thing that works against me is my apparel. In a strange hotel a man will do better, if he has \$50 only, and desires to remain two weeks. to go and buy a \$50 suit of clothes with h's money, taking his chances with the clerk, than to dress like a plain American citizen, and expect to be loved on

the grounds that he will pay h s board. But there is now a prospect of reform in this line, a scheme by which a man's name and record as a guest will be his credentials. When this plan becomes thoroughly understood and adopted, a modest man with money, who prefers to wear a soft hat, will not have to sleep in the Union Depot, solely on the ground that the night clerk

is opposed to a soft hat. The scheme, to be brief, consists of a system of regular reports from tables and rooms, which reports are ep tomized at the office and interchangeable with other hotels, on the principle of the R. G. Dun Commercial Agency. The guest is required to sign his order at the table or g ve the number of his room, whether the hotel is run on the European plan or not, and these orders in the aggregate, coming from head wa ters, porters, chambermaids, bellboys, make up a man's standing on a scale from A to Z.

Cleary's Rusiness College Reception— Music, Songs, Speeches and Social Pleasures.

When Prof. Cleary stated in his welcoming remarks, last Friday evening, that he was glad to greet the many active business and professional men of Ypsilanti, who had favored him with their presence at the fourth anniversary celebration of the establishment of his Business College, he called attention to a fact which above all the other incidents of that very pleasant occasion should have caused him to feel proud and grateful. It is, of course, a sufficient cause for gratitude, at any time or place, to be surrounded by approving and appreciative friends, but when such pleasure is so delightfully accom-

panied as were the greetings and congratulations extended to Prof. Cleary ast Friday evening—with sweetest strains of music and songs' best words and sounds, with social joy and pleasure expressed by every voice and shown in every face, and happiness complete abounding in the gaily decorated rooms. In this direction there has also been a great change. The boy now knows how to keep books before he enters the office, he is expected to be acquainted with it first. To meet this changed condition of things these institutions have sprung up. If you will take the trouble to read the history of our educational institutions you will learn that while some institutions may be made to abounding in the gaily decorated rooms | while some institutions may be made to abounding in the gaily decorated rooms and halls, ungrateful indeed would be the nature that did not respond to such evidence of interest and friendship with the highest degree of satisfaction and the freest expression of gratitude.

Such degree of satisfaction Prof.

Such degree of satisfaction Prof. Cleary did feel, and such expressions of gratitude he did give, but it was something aside from the form and show of the pleasures of that anniversary reception that we deemed his highest cause for thankfulness-and that was the presence and endorsement of practical business men to an institution and teacher of practical business methods. The music of the orchestra, the sweet words of the sougs, the glad greetings and congratulations of friends, the beautiful decorations, and the show and sounds of happiness throughout the College halls prevailing, as we have said, could cause only the highest satisfaction and gratitutude, but the pleasure derived from the knowledge of the successful work that had merited such appreciation, of promises fulfilled, of duties well performed, of success through difficulties and discouragements achieved, recognized and rewarded at last—such pleasures were deeper far and more complete than even spoken words of praise and pleasing sights and sounds.

The glad then that this commercial college has been established to meet a want that springs up from this condition of affairs. No other meets it. I am confident in the belief, however, that few commercial schools of the same age have attained to a more flattering degree of popular favor and success than has this. Nor is its favor and patronage confined to this state.

The office records bear the names of students from seven different states the past year, and my reasons are good for believing that a larger number of states will be represented the present year. CALL ON JOE!

OF THE SEASON.

Is an announcement that will many times meet your eye during the next few weeks, but it does not refer to the journeys that all who desire Clothing at poor-harvest prices are making to

Joe Sanders's Clothing House

They don't go there for pleasure, particularly, although Joe and Garrie and Will always treat their customers with the utmost cordiality, and make them feel at home; but the principal reason why so many custom-

UNION BLOCK CLOTHING HOUSE

is that they seek a place where they can get the most and best for the least money. The purpose may be a selfish one perhaps, but it is a selfishness that persuades mankind to a great extent.

CALL ON JOE.
